

## 6 WAY LOOPBACK CONNECTOR (FOR SHORE)

The NFI 6 way shore side loopback connector is a harsh environment 6 fibre multimode connector. It provides jetty system loopback at the optical level for equipment and cable test prior to connection to a compatible ship system.

The connector consists of a 316 grade stainless steel body, containing internal optical loops and has a brass blind cap. The cap is retained on to the connector by a stainless steel wire strap and the unit is supplied in a rugged equipment case.
